

# Avon Valley School

## Rugby

## Details

**Value:** £16M build

**Client:** The Avon Valley School of Performing Arts & Warwickshire County Council

## Synopsis

Replacing an old, fire damaged school building, the new Avon Valley foundation school is a Centre of Excellence for performing Arts.

The development caters for approximately 1,200 eleven to sixteen year olds.

The 10,000m<sup>2</sup>, two storey building has been designed as a low energy / sustainable project, which incorporates natural ventilation as a primary method to reduce the carbon production.

## Best in Class

Statement From Don O'Neill - Headteacher

"The school, rebuilt in 2007 includes facilities geared towards learning in the 21st Century, such as an Information Technology infrastructure which provides a virtual learning environment in each curriculum area.

Students have the ability to access tasks set by teachers online and submit a completed task back to the teacher for marking. Parents can also track their child's task progress and view up to date attendance, behaviour and assessment information.

There is a state of the art theatre, with control room, recording studio and associated practice rooms, reflecting our specialist status. Students work in spacious rooms, equipped to a high specification, which undoubtedly creates a climate for further academic achievement and success."
