

WMG Academy Coventry

Details

Value: £10million (Build)

Client: Lorne Stewart

Anderson Green's Duties:

- Full detailed M&E Design
- Production of fully co-ordinated drawings
- Part L /EPC production /compliance

Synopsis

The building comprised of a 3 storey education building and a refurbished Kitchen/ Dining Area. The new build consisted of Learning Bases, Meeting/ Interview Rooms, Offices, Break Out Spaces, Technical and Manual machining areas; along with showcase and exhibition areas.

Anderson Green were responsible for the detailed design and co-ordination of the building services, the Part L compliance calculations along with the thermal model and level 5 Energy Performance Certification (EPC).

The building includes a number of PV Technologies and achieves a BREEAM rating of Very Good.

Best in Class

The new building will provide a safe, welcoming and accessible learning environment.

Due to large areas of exposed concrete slabs and downstand beams, the M&E services were carefully co-ordinated to provide an aesthetically pleasing end product.

This was accomplished by working closely with the Architect and Structural Teams.
