SECTOR: Justice

CROYDON BOROUGH-BASED COMMAND CENTRE

Croydon Borough-Based Command Centre (BBCC) is a new 40-cell custody suite and base command with an internal floor area of approximately 3,200m² split over two floors.

We were responsible for the detailed design and co-ordination of the M&E services, the production of Thermal models, Part L Compliance Assessments and renewable technologies assessments to meet local planning conditions. Our commission was extended to incorporate site quality monitoring, an audit of the final H&S documents and a post-occupancy review with the team.

The project required the use of a 3D, virtual design system, which ensured that all products and services were designed and co-ordinated in detail prior to the fabrication of the cell modules, which eliminated any clashes and ensured a quality delivery of the services.

PROJECT DETAILS

- Client – Metropolitan Police Authority
- Main Contractor – Wates Group
- Value – £16m
- Area 3,200m²
